

BioMax

BioMax - Composted Poultry Manure and Sawdust

A blend of nutrient rich poultry manure mixed with sawdust. Composted for 22 weeks and screened to 10mm. Used with great results in broadacre and horticulture applications for over a decade.

Composted manure products provide vital organic and biological components to maintain a healthy soil condition and structure. Not only does it provide plant available nutrients, but it also reacts with the soil allowing the release of mineral nutrients that would normally remain locked up in the soil. Composted products are also well known for increasing soil carbon levels and improving moisture retention within the soil.

The quality standards and procedures followed by Organic Nutrients meet the strict food safety standards required by growers to supply all the major Australian supermarkets. Our products are made using 100% natural ingredients and are certified as an allowed input for organic production by Australian Certified Organics (ACO). This allows agronomists, farmers, horticulturists and viticulturists to use our products knowing they are safe and meet their QA requirements.

Reduce your reliance on synthetic fertilisers. Use compost from Organic Nutrients to feed your soil and nourish your crop.

Average Total Nutrient Content (in dry weight)

Nitrogen (N)	3.2%
Phosphorous (P)	1.4%
Potassium (K)	1.9%
Calcium (Ca)	10.3%
Carbon	31%
Magnesium (Mg)	6800 mg/kg
Sulfur (S)	5000 mg/kg
Iron (Fe)	5600 mg/kg
Zinc (Zn)	290 mg/kg
Copper (Cu)	40 mg/kg
Sodium (Na)	4100 mg/kg
pH (1:5 Water)	7.4
